Custom Fabrication for Superior Performance

Our team of experts works closely with you to determine the critical traits and most effective materials your product needs for maximum performance. It's a proven process from nearly half a century of developing precise, innovative and cost-effective custom foam solutions. Our ISO 9001:2000-certified facility, equipped with a Class 10,000 clean room, allows us to deliver high-quality production and on-time delivery.

Full Range of Materials

- Open- and closed-cell foams
- Melamine foams
- Coatings and dyes
- Acrylic
- Polyethylene
- Polycarbonate
- Polyimide
- Rubber
- Urethanes
- Water-based, hot melt, adhesive backing and bonding agents
- Self-skin
- Laminates—clear Mylar®, metalized Mylar (conductive and non-conductive), Tedlar®, Tyvek® and Melinex®
- Other innovative material

Products and Components That Span the Medical and Pharmaceutical Worlds

- Solution delivery, oral and prep applicators and swabs
- Ambulance, examination and surgical table, hospital bed mattress, stretcher and side rail, wheelchair, imaging and other padding
- Protective and orthopedic braces, positioning pads and supports
- Cervical collars
- Fluid regulators
- Pharmaceutical and medical device components
- Packaging
- Surgical drapes
- Surgical fluid collection trays and inserts
- Test tube holders
- Thermal insulation
- Wound and postoperative dressings
- And more

Fabrication Capabilities for Any Need

- Automated spray line
- CNC saw cutting
- Compression molding
- Thermal and vacuum molding
- Convoluting
- Die-cutting
- High-speed grinding
- Horizontal slitting
- Hot-wire cutting
- Lamination
- Packaging
- Self-skinning
- Waterjet cutting
